Dr. Cecille G. Carandang
CESO VI School Division Superintendent
School Division Office, San Juan City

Dear Dr. Carandang,

Greetings in pursuit of Academic Excellence!

The curriculum of the Bachelor of Science in Computer Engineering includes an On-the-Job Training for the 3rd year students every summer class with a minimum of 54 hours of training.

The main objective of this course subject is for the students to acquire experience and hands-on skills in their respective area of specialization. This furthermore exposes them in the actual work in the Computer Engineering field. It is also a good avenue for the students to help develop their professional career and technical expertise.
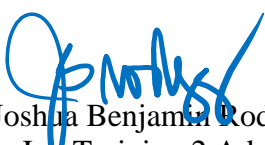

In connection thereof, I would like to recommend the following students:

Mr. Mark Rafael Sarmiento

a 3rd year Computer Engineering student. I am confident that you will assist us in developing the technical know-how and practical skills of our student. The department acknowledges the significant role of the industry in accomplishing the objectives of the training.

Thank you for being with us in this noble undertaking.

Respectfully yours,

Engr. Joshua Benjamin Rodriguez
On-The Job Training 2 Adviser, Computer Engineering Department
